SHRI NIRMAL CHATTERJEE:

Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) whether Government are aware of the fact that the incidence of polio is increasing in the country;

THE MINISTER OF STATE IN THE DEPARTMENT OF HEALTH IN THE MINISTRY OF HEALTH AND FAMILY WELFARE (KUMARI SAROJ KHAPARDE): (a) and (b) No, Sir. Actually there was a decrease of Poliomyelitis cases during 1984 and 1985 as

compared to that in 1982 and 1983. But there is a slight increase of cases during 1985, as compared to that in 1984, which might be due to the increased awareness of the disease and, detection of cases. The number of cases of Poliomyelitis reported to the Central Bureau of Health Intelligence (CBHI) by the medical institutions during the past four years is as under:—

Year	Cases
1982	21469
1983	21310
1984	18040
1985	19733

The above figures reflected only the reported cases by the various medical institutions.

(c) To reduce the morbidity and mortality due to Poliomyelitis, Polio vaccinations has been included under the Expanded Programme on Immunization from 1979-80. The coverage of Polio Vaccination has been steadily increasing from 16.10 lakh infants in 1980-81 to 119.08 lakh infants in 1985-86. It is planned to cover 183.00 lakh infants in 1989-90. The Universal Immunization Programme started in 1985-86 also involves immunization against Poliomyelitis and, by 1990, 85 per cent of infants would be covered under this programme. This percentage of coverage, it is expected would be enough to provide the 'herd immunity' against the disease.
